

Product Environmental Profile

Motor circuit breaker, TeSys Deca, 3P, 48-65A

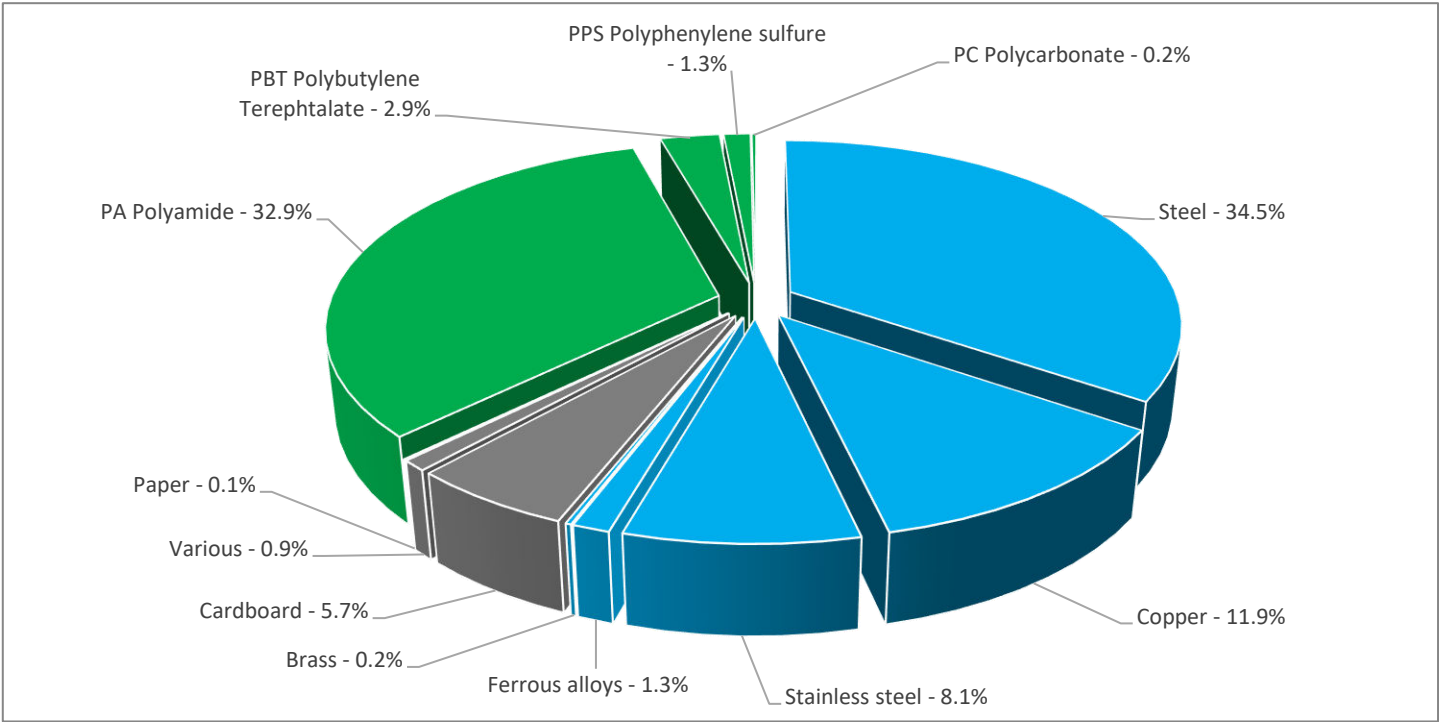

General information

Representative product	Motor circuit breaker, TeSys Deca, 3P, 48–65A - GV3P65
Description of the product	The main purpose of the product is to protect three-phase motors, the cables, the people, against short circuits and overloads.
Functional unit	Protect during 20 years the installation against overloads and short-circuits in circuit with 690V and 65A. This protection is ensured in accordance with the following parameters: <ul style="list-style-type: none">- Number of poles 3P- Rated breaking capacity 6KA

Constituent materials

Reference product mass	1020.56 g including the product, its packaging and additional elements and accessories
------------------------	--

Plastics	37.3%
Metals	56.0%
Others	6.7%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 2 January 2013, amended in March 2015, 2015/863/EU and in November 2017, 2017/2102/EU) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers – PBDE), Bis (2-ethylhexyl)phthalate - DEHP, Benzyl butyl phthalate– BBP, Dibutyl phthalate - DBP, Diisobutyl phthalate - DIBP) as mentioned in the Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

<http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page>

Additional environmental information

The Motor circuit breaker, TeSys Deca, 3P, 48-65A presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 60.6 g, consisting of Cardboard (99%) and paper (1%) Product distribution optimised by setting up local distribution centres
Installation	Ref GV3P65 does not require any installation operations.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains Plastic parts with brominated FR (89.01g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 63% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years			
Product category	Circuit-breakers			
Installation elements	No special components needed			
Use scenario	Load rate: 50% of In Use time rate: 30% of RLT			
Geographical representativeness	France			
Technological representativeness	The main purpose of the product is to protect three-phase motors, the cables, the people, against short circuits and overloads.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: France	Electricity mix; AC; consumption mix, at consumer; 230V; FR	Electricity mix; AC; consumption mix, at consumer; 230V; FR	Electricity mix; AC; consumption mix, at consumer; 230V; FR

Compulsory indicators		Motor circuit breaker, TeSys Deca, 3P, 48-65A - GV3P65					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life
Contribution to mineral resources depletion	kg Sb eq	4.72E-03	4.71E-03	0*	0*	1.06E-05	0*

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.9.4, database version 2022-01 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number	ENVPEP060901EN_V4	Drafting rules	PCR-ed3-EN-2015 04 02
