

DOGGER Nylon Fish Tape

The Dogger Fish Tape is flexible and passes easily even through tough passages thanks to the design of the search spring. The Fish Tape is made of 4 mm monofil polyamide. It's flexible in all directions to the point that it bends but doesn't break, in other words it always keeps its' form. It doesn't conduct electricity. The Dogger Fish Tape can be used together with our shatter-proof case that makes both cable pulling and storage easier. The inside attachment locks the fish tape, making the case an efficient pulling tool.

Accessories to the Dogger Nylon Fish Tape

Dogger Inserter

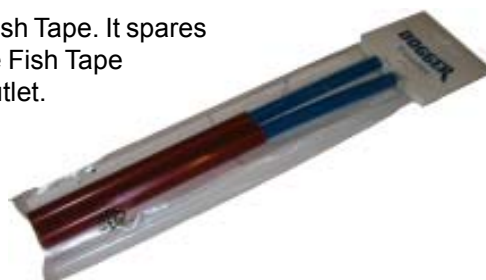

The Dogger Inserter is an efficient complement to our Fish Tape. It spares your fingers and hands and makes it easier to insert the Fish Tape through the often tough first passage at the electrical outlet.
