## Accessories and Spare Parts

For thermostats RAK-..., RAZ-... and sensors

**ALT-A...**  
**ALT-C...**  
**AQM63.2/3**  
**FK-TZ1**

- Perforated protection pocket for air duct mounting
- Mounting kit
- Adjustable mounting flange
- Plastic Capillary clamps
- Metal Capillary clamps

## Type summary

| Type reference   | Name                                                | Use               | Material          | Immersion length<br>[mm] | Inner dia. of pocket<br>[mm] | Weight<br>[kg] |
|------------------|-----------------------------------------------------|-------------------|-------------------|--------------------------|------------------------------|----------------|
| <b>ALT-AB200</b> | Protection pocket, perforated, with coupling spring | Air duct mounting | Steel, galvanized | 240                      | 15                           | 0.125          |

| Type reference  | Name                 | Contents                      | Use                                                                                                            | Material          | Weight<br>[kg] |
|-----------------|----------------------|-------------------------------|----------------------------------------------------------------------------------------------------------------|-------------------|----------------|
| <b>ALT-C001</b> | Mounting kit         | 1 spring 100 mm               | For fixing the sensing element inside the perforated protection pocket (to prevent noise caused by vibrations) | Steel             | 0.034          |
|                 |                      | 1 clamping band 330 mm        | For fitting the RAK to pipes                                                                                   | Steel, galvanized |                |
|                 |                      | 4 clamps                      | Wall mounting: For securing the sensing element inside the protection pocket                                   | Steel             |                |
| <b>AQM63.0</b>  | Mounting accessories | 1 mounting flange, adjustable | Suited for air ducts with up to 70 mm insulation                                                               | PA66GF35          | 0.038          |

| Type reference | Name                                                                                  | Measure<br>[mm]                 | Use                                                                                                    | Material                         | Weight<br>[kg] |
|----------------|---------------------------------------------------------------------------------------|---------------------------------|--------------------------------------------------------------------------------------------------------|----------------------------------|----------------|
| <b>AQM63.3</b> | Capillary clamps made of plastic (1 Set includes 6 pcs)                               | L = 50 mm, H = 62 mm, D = 25 mm | For fixing capillary tube to the heat coil.                                                            | Plastic (Glass fiber reinforced) | 0.05           |
| <b>AQM63.2</b> | Capillary clamps made of plastic (1 Set includes 3 pcs) incl. 3 metal distance holder | L = 50 mm, H = 62 mm, D = 25 mm | For fixing capillary tube to the heat coil. Additional are 3 pieces of metal distance holder included. | Plastic (Glass fiber reinforced) | 0.05           |
| <b>FK-TZ1</b>  | Capillary clamps made of galvanized steel (1 set includes 6 pcs)                      | L = 50 mm, H = 37 mm, D = 6 mm  | For fixing capillary tube to the heat coil.                                                            | Steel galvanized                 | 0.06           |

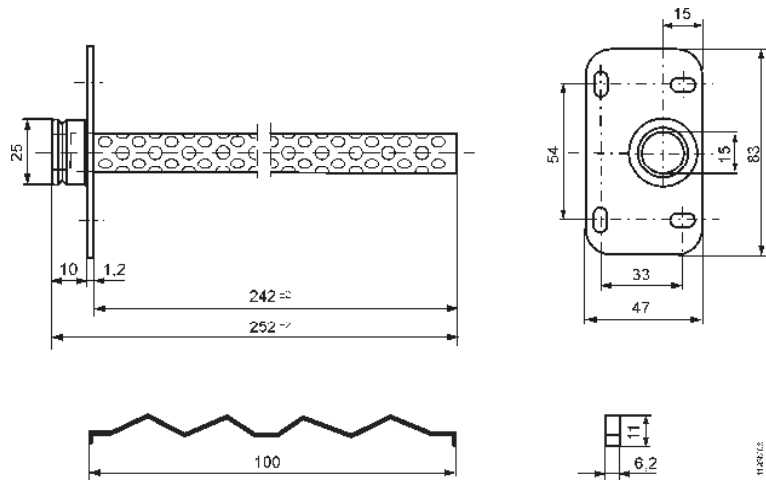

## Disposal

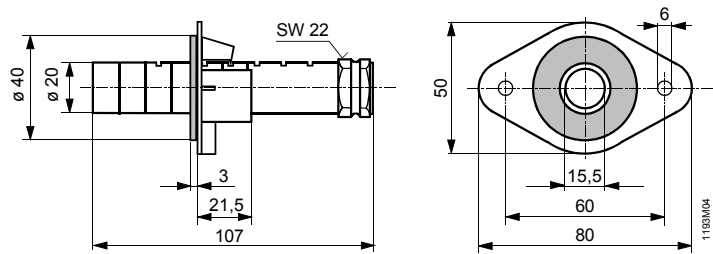

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device via the channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
