CVVX 125 Combi grille, white

Construction

The Combi-Grid is manufactured in white (RAL9016) powder-coated galvanized sheet steel. Suitable for mounting on outside walls. The outside-air intake and exhaust-air are separated from each other so that the exhaust-air wont get in again.

Mounting

6 screws on the front facilitate mounting and removing for cleaning. The grid has a back plate which is first screwed and fitted to the wall. The grid can be mounted with the exhaust-air outlet either on the right or the left.
